

HARDI MINIDRIFT DUO

Air inclusion nozzles

MINIDRIFT DUO

HARDI MINIDRIFT DUO Air inclusion nozzles

The HARDI MINIDRIFT DUO nozzle can be used for spraying under sub-optimal weather conditions when spraying cannot be postponed. The MINIDRIFT DUO nozzle will at low pressures reduce drift to a minimum.

- Working pressure: 1.5 to 6 bar
- ISO flow, colours, sizes and nomenclature
- 30° forward and backward angle
- Application rates from 125 to 420 l/ha (at 8 km/h)
- SYNTAL – precision moulded thermoplastic

This compact flat spray air-injector nozzle offers droplet spectrum from medium to very coarse; safe for drift control but without risking poor coverage and deposition on leaves. The two angled fans increase the number of droplets and impacts on target compared to normal air injector nozzles. This improves the coverage on dense foliage and vertical targets.

The injector can easily be removed for cleaning the nozzle.

The HARDI MINIDRIFT DUO nozzles can be mounted using the 334083 ISO cap.
